  - Youth unemployment
  - Low pay
  - Progression
  - Insecurity
- Some people and areas remain cut off from the prosperity and jobs that growth can bring
- Inequality is bad for growth

City Deal: Tackling Poverty and Inequality

Glasgow, 27<sup>th</sup> May 2015

# Deliver the Best Quality Aesthetics & Design

- Visible quality and attractiveness in one's surroundings matter for mental wellbeing.
- There may be several reasons for this:
  - Brightness; provision of light.
  - Visual interest and enjoyment/amenity.
  - Signal of change.
  - Signal of status.

# Behavioural Change Requires Personal Support

- Structural environmental changes are not enough to induce behavioural changes among resident groups.
- Behavioural change interventions delivered concurrent with structural changes may generate a greater social return on the investment.

# Seek to Provide Local Employment Opportunities

- Employment has the biggest health impacts.
- Tactics: targeting employment efforts to assist local regeneration.
- Strategy: links between economic development, education and training, and site developments.
- Support: in-work support as well as brokering into jobs.

# Where Possible, Develop Mixed Communities

- Residents in mixed tenure communities have fewer health problems.
- Residents who perceive their areas to be ethnically mixed report better cohesion and empowerment outcomes.

# Co-Produce Empowerment with and within Communities

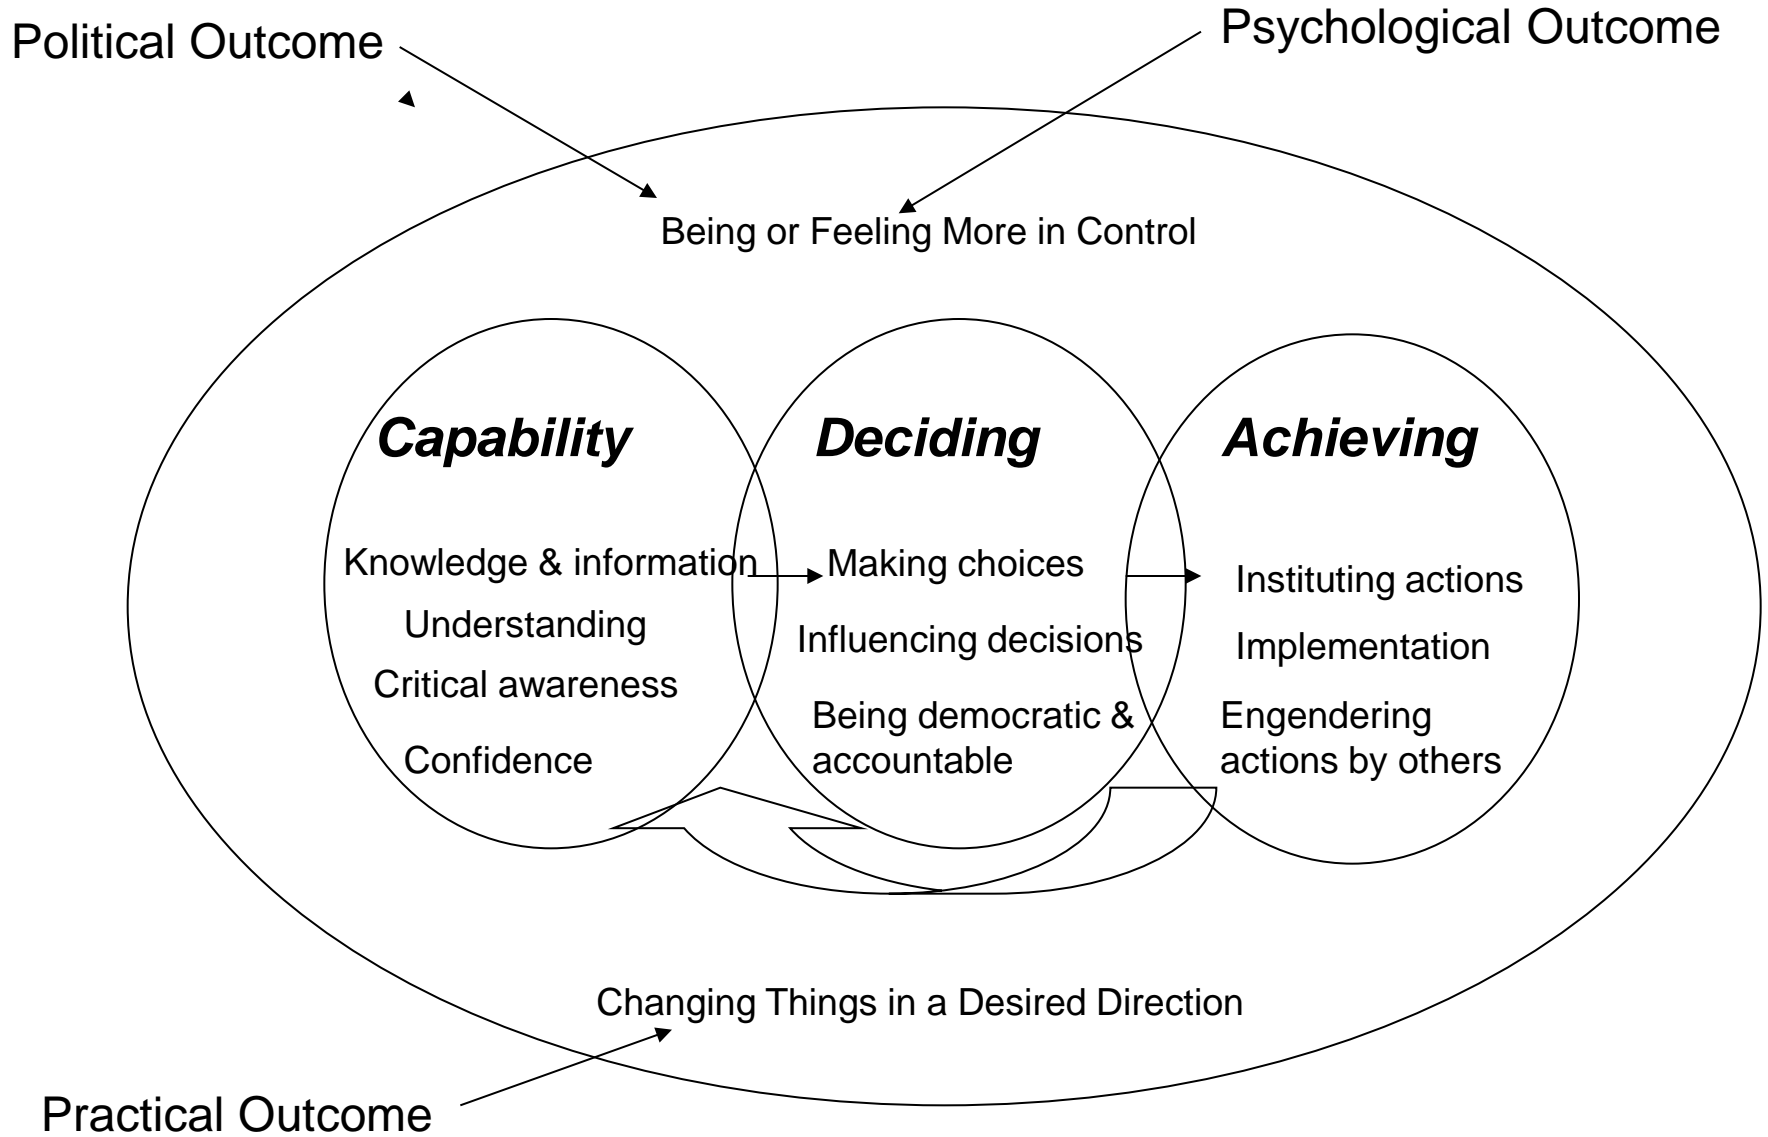

- Influence: having influence over decisions that affect your local area.
- Response: getting a positive response when you ask things, or raise issues with public service providers.
- Pro-activity: being able to take action for yourself as a community.

# Empowerment and Mental Wellbeing (GoWell Wave 2)

	Relative Risk of High MWB (vs Low)	
	Adjusted for Socio-demographics <sup>1</sup>	Adjusted for other forms of empowerment
Community Influence	3.80	2.20
Service Responsiveness	3.37	1.66
Proactive Capacity	3.66	1.64

1. Includes: age; household structure; ethnicity; health; employment status; vehicle access.

# A Model of Community Empowerment (Qualitative)

# Create Positive Local Trajectories

- People notice public realm improvements.
  - But they also notice low level issues like cleanliness.
- A local presence from the key actor(s) is also appreciated.
- Communicate regularly with people.
- Positive local narratives are important.
